PRODUCTION PROJECTS	CLOUD PROVIDERS	TEST ASSERTIONS	FHIR R4 RESOURCES	COST REDUCTION	LINES OF CODE

SUMMARY

The rare developer who has treated patients AND built the platforms they use. Former Physiotherapy Technologist (4 years clinical care) turned Full Stack Engineer. I architect multi-cloud healthcare platforms that pass HIPAA/GDPR compliance scans — not on slides, but in production code verified by Prowler and Checkov. I reduced a $300/month cloud bill to $2/month. I ship with 756+ automated test assertions. Available remote, contract or full-time.

TECHNICAL SKILLS

Cloud & DevOps: AWS (Cognito, DynamoDB, KMS, Bedrock, IoT, Lambda, MSK) · GCP (Cloud Run, BigQuery, Vertex AI) · Azure (AKS, Cosmos DB, OpenAI) · Terraform · Docker · Kubernetes · GitHub Actions

AI & RAG: LightRAG · RAG-Anything · AI Circuit Breaker (Bedrock/Vertex/Azure OpenAI) · LangChain · n8n · Dialogflow

Frontend: React 18/19 · Next.js 16 · TypeScript · Tailwind · Vite · shadcn/ui · Framer Motion · GSAP · Capacitor 8

Backend: Node.js/Express · Python FastAPI · PHP 8.1+ · WordPress 7.0 · GraphQL · Kafka · MQTT · Stripe

Data: PostgreSQL (RLS, pgcrypto) · DynamoDB · Supabase · Redis · MySQL · BigQuery

Healthcare: HIPAA 2026 · GDPR/Schrems II · SOC 2 · FHIR R4 (35 resources) · SMART on FHIR · HL7 v2.x · C-CDA 2.1 · OSHA · ESIGN · CCPA

Medical Standards: LOINC · SNOMED CT · RxNorm · ICD-10/11 · CVX · NDC · CPT · HCPCS

PROJECTS & IMPACT

MediConnect V3 — Tri-Cloud Telehealth Platform

2026

Lead Architect — React 18 · Node.js · Python FastAPI · AWS + GCP + Azure · Kubernetes · Terraform

- Cut cloud cost from $300+/month to **$2/month (99.3% reduction)** via Zero-Cost Idle Architecture across 3 clouds with 414 Terraform resources — verified by Prowler on HIPAA, GDPR, SOC 2, ISO 27001
- Achieved **99.99% AI availability** via Circuit Breaker across Bedrock (Claude) / Vertex (Gemini) / Azure (GPT-4) — 13-step RAG pipeline with PII scrubbing, confidence scoring, and hallucination detection
- Delivered **35 FHIR R4 resources** with 10 medical terminology systems — SMART on FHIR 2.0, full DICOMweb REST API (PS3.18), C-CDA 2.1 document generation, and ONC-compliant interoperability
- Shipped **756+ test assertions** across 7 microservices (44,500+ LOC) — Kafka streaming (7 topics), IoT vitals via MQTT, Chime video consultations, 3-tier Stripe subscriptions with 24-loophole protection

RAG Production Stack — Enterprise AI Infrastructure

2026

DevOps & AI Engineer — Docker · LightRAG 1.4.6 · Prometheus · Grafana · Jaeger · Authelia

- Deployed **23 containerized services** on a single 8GB machine — 3-network isolation (frontend/backend/monitoring), zero-trust 2FA on every route, container hardening (read-only root, dropped capabilities, no-new-privileges)
- Built **full observability stack** (Prometheus + Loki + Jaeger + Grafana + AlertManager) and **6 compliance scanners** (Checkov, Trivy, SonarQube, OWASP ZAP, HAPI FHIR, Inferno ONC G10) — all at zero additional cost

EquipCert AI — Safety Inspection SaaS 2026

Full Stack Mobile Engineer — Next.js 16 · React 19 · Supabase · Capacitor 8 · Stripe

- Replaced 30-minute paper inspection with **60-second digital workflow** — AI identifies equipment from photo, loads dynamic CMS checklist, captures GPS evidence, generates OSHA-compliant PDF report with legally-binding digital signature
- Built **multi-AI provider abstraction** (Gemini/OpenAI/Claude switchable via single env var), offline-first IndexedDB with SHA-256 integrity, 3-tier Stripe billing with DB-level feature gating — fixed **25 security vulnerabilities** from full audit

EDS Dental — Clinic Platform for Real Client 2026

Full Stack Engineer — React 18 · Supabase · Cloudflare Pages · FHIR R4

- Delivered production platform for a real dental clinic (Dr. Arman Hossain, BDS, Dhaka) — **HIPAA 95%** (18/19 checks), 10 FHIR R4 resources with SNOMED CT + ICD-10 bindings, AES-256 PHI encryption, bilingual English/Bengali
- Built compliance CI/CD gate (**blocks non-compliant deployments**) — 9 Edge Functions, 9 migrations with RLS, 6 breach detection rules, 60-check audit scanner, Stripe payments

Chronos V2 — Headless E-Commerce 2026

Full Stack Engineer — React 18 · WordPress 7.0 · WooCommerce · WPGraphQL · Stripe

- Achieved **3x faster page loads** via decoupled headless architecture — custom OOP PHP 8.1+ plugin (27 classes, 4,791 LOC, PSR-4), WordPress 7.0 AI Client for auto-generated descriptions, real Stripe Checkout with webhook signature verification
- Shipped **52 tests, 0 PHPCS errors**, 3 CI/CD workflows (PHP + blocks + frontend), WCAG 2.1 AA accessibility, GDPR data export/erase via WordPress Privacy API

HealthCode Analysis — WordPress Automation 2025–2026

WordPress Engineer — WordPress 6.9 · PHP 8.2 · Cloudflare Workers · Python

- Automated multi-customer site deployment — **single command** swaps all content, images, and SEO metadata via custom REST API bridge with dry-run preview; **281 tests** (59% coverage), 2 CI/CD pipelines
- Built Dark Glassmorphism Design System (vanilla JS, zero dependencies) and **AskMe AI chatbot** on Cloudflare Workers with Dialogflow ES — $0/month, scales to unlimited posts

ADDITIONAL

n8n Automation — Competitor pricing monitor (daily AI scraping → Google Sheets) + autonomous lead qualification agent (LangChain + Wikipedia research + scoring + cold email generation)

Portfolio — zahidul-islam.vercel.app (React 18, TypeScript, Framer Motion, 9 projects showcased with live demos)

CLINICAL & PROFESSIONAL BACKGROUND

Physiotherapy Technologist 2017–2021

SPKS Medical Institute, Dhaka, Bangladesh

4 years hands-on clinical patient care — patient assessment, treatment planning, musculoskeletal rehabilitation. This is not a footnote: it directly informs every FHIR resource I model, every clinical UI I design, and every compliance rule I implement. I know what clinicians need because I was one.

Diploma in Physiotherapy Technology · SPKS Medical Institute · 2017

Independent technical development (2021–Present) — AWS/GCP/Azure, HIPAA/GDPR/SOC 2/FHIR R4, Kubernetes, Terraform, full-stack — all production-verified, not certificates.

PROFESSIONAL ETHICS

> I maintain firm ethical boundaries in all engagements. I do not accept projects involving interest-based finance (Riba), conventional insurance, gambling, adult content, or any activity that conflicts with Islamic principles. This is a non-negotiable professional standard. Every project I deliver comes with 100% source code ownership, complete documentation, and transparent communication.

Remote · Contract & Full-Time · English (Working Proficiency) · Bengali (Native) · GMT+6 (Dhaka)
